POL2012: Theories and Models in Political Economy

The financial crisis, recession and stagnation

Marius Swane Wishman

25th October 2021

- Real estate bubble
- ► Home prices up 60% 2000-2006
- Subprime loans
- Securitization
- Crisis goes global

Subprime Mortgage Originations

In 2006, \$600 billion of subprime loans were originated, most of which were securitized. That year, subprime lending accounted for 23.5% of all mortgage originations.

NOTE: Percent securitized is defined as subprime securities issued divided by originations in a given year. In 2007, securities issued exceeded originations.

But why did it happen?

- \$200 billion injected into the market by the Fed, the ECB and the Bank of England
- Expansionary monetary policy → low interest-rates
- United States continued stimulus in the range of \$800 billion
- ► ECB turned to fiscal discipline
 - Sovereign debt

- What is appropriate for Germany may not be appropriate for certain other EU countries
- And vice-versa
- ► The United States has this problem too!
- ► However, it is easier to get Americans to bail out fellow Americans

Who do you think fared better?

Recovery

Lazy Southern Europeans or draconian Germans?

- Piketty: "Germany has never repaid its debts. It has no right to lecture Greece."
 - Two ways to repay debt:
 - ► Strict budgetary discipline over 100 years
 - ► Inflation, tax on private wealth, debt relief
- Krugman: Eliminating deficits during a crisis is a recipe for depression. Leave the Euro.
- ► Ferguson: Clean slate makes no sense if the problem is structural

Is the west going the way of Japan?

► No/low growth, little/no inflation, low/negative interest rates
